Worlds First Decentralized OnlyFans

The New Concept for OG OFs

Get Paid in Crypto

Create your DeOF profile in a minute. Convert your OFNs into an asset.

DeOF secures your identity and keeps your OFNs safe.

Decentralization will keep hackers away from breaking into your profile.

- 1) Upload your OFNs and get paid in the most reliable cryptos like Polygon and Ethereum. Most secure way to get paid.
- 2) Unless you reveal your face your identity is secured/locked/private.
- 3) Sell your most liked OFNs of the month as an NFT and create it as an asset.
- 4) No email or other info is required to log in, just your metamask wallet is enough.
- 5) Very low possibility of someone stealing your content, as it will be stored in the blockchain.
- 6) If content reaches high reach creator can unlock the chat feature to talk to fans which they will pay extra, some down payment will be required to unlock the feature.
- 7) DAO - Once the monthly users increase people will convert USD to DeoFToken and will be eligible to enter the DAO and can vote which creator is good and which should be kicked out.

Code Required

- 1) Code for Metamask connection
- 2) Code to post nfts
- 3) Code for Payment in Crypto
- 4) Ethereum chain
- 5) Security Audit
- 6) DeOF Token (secondary)
